Index

Note: Page numbers of article titles are in **bold face** type.

ACROMEGALY, 119–120
Age, and pain, 29
Amyloidosis, 119, 198, 256
Anaesthesia, and arthrocentesis, 151
Ankle joint, 11
  synoviography of, 144, 145
Ankylosing hyperostosis and ankylosing spondylitis, 236–237
Ankylosing rheumatoid arthritis and ankylosing spondylitis, 237
Ankylosing spondylitis, 101, 103–105, 232–238
  childhood, 124
  in families, 237–238
  measurements of, 46–47
  serum chemistry, 258
  serum proteins, 259
  synovial fluid in, 263–264
Antibodies—
  double-stranded (viral) RNA, 227–228
  extractable nuclear antigen, 229
  to polynucleotides in clinical rheumatology, **223–229**
Antigens, histocompatibility, 231–232
Anti-Ig activities, 213–218
Anti-immunoglobulin antibodies, different types of, 211–212
Anti-inflammatory drugs, changes in the thermographic index after oral non-steroidal, 58, 61–63
Antinuclear factors in synovial fluid, 169–170
Anti-rheumatic therapy, thermographic assessment of long-term, 63
Anxiety and pain, 29
Arthritis—
  juvenile, 123–127
  juvenile chronic, 246–248
  post-infective reactive, 242–243
  Reiter's syndrome and reactive, 239–243
  thermography in the assessment of inflammatory, **51–64**
Arthrocentesis—
  laboratory samples required, 154–155
  technique of, 151–155
Arthropathies—
  crystal, 109–116
  inflammatory, arthroscopy of, 86
Arthroscope, insertion of the, 81–82
Arthroscopic diagnoses, 87–88
Arthroscopy, 77–91
  and arthrotomy, 90
  biopsy at, 181
  complications of, 84
  illumination and photography, 79–80
  indications for, 88
  optics, 77–78
  photographs, biopsy and after-care, 82–84
sterilisation and, 80–81
  therapeutic value of, 84–85
Arthrotomy, arthroscopy and, 90
Aspiration, of knee and other joints, 151–154
Assessment for clinical trials, **37–49**
Autograft lymph, composition of, 282

B-CELL system, anti-Ig activities related to the, 213–217
B-lymphocytes, anti-Ig activity related to membrane bound Ig of, 217
Biochemical tests, effects of drugs on, 265–267
Biopsy, nodule, 192
Bleeding diatheses, 116–118
Blood flow, radioisotopic measurements of, 67–68
Bone changes in gout, 110, 112
Bowel disease, inflammatory, 243–244
Buccal mucosal glands, biopsy of, 206

CALOR and rubor, 42
Cartilage biopsy, 192

Cell count—
differential, 163–164
total, 157–158
Cell morphology, 158–163
Cervical spine, and degenerative spondylitis, 121
Cervical spine motion, measurement of, 17–19
Charcot's joints, osteoarthrosis and, 109
Chest expansion—
measurement of, 19–21
normal range, 22
Christmas disease, 116–117
Clinical trials, assessment for, **37–49**
Complement, synovial fluid, 168–169
Condylar joints, 5
Cotylic joints, 5
Crystal arthropathies, 109–116
Crystals—
in synovial fluid, 170–176
optical properties of, 170–172
Cytology, 156–164
Cytotoxic agents in anti-rheumatic therapy, 63

DEGENERATIVE arthropathies, arthroscopy of, 86
Dermatomyositis, 105–106
Disseminated lupus erythematosus, 99
Diatheses, bleeding, 116–118
Diseases—
effect of on pain threshold, 32–33
measursement of aspects of, 45–47
Distraction and pain, 29
DNA antibodies, 223–227
Dolour, 42
Dominant hemisphere and pain, 29
Drugs, effects of on chemical tests, 265–267

ELBOW joint, 9
synography of, 133, 136
Endoscopy and arthroscopy, history of, 77
Enzymes—
in rheumatoid disease, 263
synovial fluid, 166–167
Erosive arthropathy, childhood non-specific, 124
Experience, past, and pain, 29
Experimental observation of lysosomal enzymes, clinical implications of, 288
Extra-skeletal changes in rheumatoid arthritis, 98–99

FE-BEARING cells, relation of 'anti-Ig-like 'activities to, 217–218
Feet, synography of, 144
Finger joints, 8–9
synography of, 131–133
'Forme fruste' of ankylosing spondylitis, 234
Freiberg's infraction, 126–127

Function—
loss of, 43
overall, 44–45
Functional capacity, measurement of, 44–45
Functions, specific, 45

GLUCOSE in rheumatoid disease, 263
Glucose content of synovial fluid, 167
Goniometer, the, 6–7
Gonococcal arthritis, Reiter's syndrome and, 242
Gout, 109–114
and synovial fluid, 264
childhood, 125
measurements of, 47
serum chemistry, 260–261
aerum uric acid, 259–260
Grent toe metatarsophalangeal joints, osteoarthrosis and, 108

HAEMACHROMATOSIS, 114
Haemophilia, 116–117
Hands, in acromegaly, 119
Hinge joints, 5
Hip joint, 10
in rheumatoid arthritis, 94, 96
osteoarthrosis and the, 107
synography of, 137
Hips and knees in acromegaly, 120
Histology, nodule, 192–195
HL–A antigens in miscellaneous rheumatic diseases, 248–249
HL–A 27, ankylosing spondylitis without, 238
Homograft lymph, intracellular enzymes in, 282
Homograft results, interpretation of, 282–288
Hydroxyapatite periarthritis, 114, 116
Hypertrophic osteoarthropathy, 118–119
Hypnotic suggestion, and pain, 29

IATROGENIC changes, in rheumatoid arthritis, 98
Idiopathic evascular necrosis, 125–127
Immunology, synovial fluid, 167–170
Indomethacin, effects of, 266
Inflammation, measurement of, 42–43
Infra-red radiation and inflammation: experimental justification, 52–53
Interphalangeal joints of the hands, terminal, and osteoarthrosis, 108
Iritis, and ankylosing spondylitis, 234–236
Isotopes, and drugs, 71

JACCOUD'S arthritis, 125
Joint, measurements for studies of a single, 47–48
Joint contents, examination of by arthroscopy, 82

Joint disease, lysosomal enzymes in diagnosis and assessment of, **273—292**
Joint fluid anti-Ig, 214–215
Joint motion—
  general tests of, 23
  measurement of, **3–24**
  measurement of peripheral, 6–11
  normal range of, 7–8
  principles for measuring, 5–6
Joints—
  classification of, 4–5
  optimum time to scan inflamed, 72–73
Joints, tendon sheaths and bursae in feet, 144
Juvenile arthritis, 123–127
Juvenile chronic arthritis, 246–248
Juvenile rheumatoid arthritis, 257–258

KIENBOCK's disease, 126
Knee joint, 10–11
  arthroscopy of internal derangement of the, 87
  aspiration of the, 151–154
  in rheumatoid arthritis, 96
  osteoarthrosis and the, 108
  physical characteristics of the, 155–156
  synoviography of, 138–143
Kohler's disease, 127

LATERAL 'coronal' flexion, 16
Light microscopy, compensated polarised, 172–173
Liver function tests—
  in juvenile rheumatoid arthritis, 258
  in rheumatoid arthritis, 254
Liver toxicity of salicylates, 265
Lumbar spine, and degenerative spondylitis, 121–122
Lymphocyte populations and anti-Ig activities, 212–219
Lymphocyte subpopulations, per cent distribution of the various, 218–219
Lysosomal enzymes—
  in diagnosis and assessment of joint disease, **273–292**
  relationship to changes in other intracellular enzymes, 277
  relationship to disease category, 275–288
  relationship to severity of disease, 288–290
  relationship to treatment of joint disease, 290–291

MEASUREMENT—
  choice of a, 37–48
  the manner of the making of the, 48–49
Microbiology of a synovial fluid, 164–165
Motion, general index of range of, 23
Mucin test, 166
Mucosa—
  oral and nasal, 206
  rectal, 204–205
Muscle biopsy, 198–200
Muscle histology, 200–202

N-DNA ANTIBODIES—
  correlation with disease activity, 225–227
  disease specifity, 224–225
  methodology for detecting, 224
Nasal mucous membranes, biopsy of, 206
Needle biopsy, 179–181, 199–200
Nodules, 192–195
Nuclear antigen, antibodies to extractable, 229

OPEN biopsy, 199
Open (surgical) biopsy, 181–182
Osteoarthropathy, hypertrophic, 118–119
Osteoarthrosis, 106–109
  childhood, 125
  measurements of, 47
Osteochondritis, 125–127
Osteoporosis, juxta-articular, 93–94

PAIN, visual analogue and graphic rating scales, 39–40
Pain or pain relief, should we measure?, 41–42
Pain measurement, 37–42
  experimental, 27–28
  miscellaneous methods, 40–41
Pain threshold, 27–28
  clinical methods of measuring, 32
  correlation between methods of measuring, 32
  effect of diseases on, 32–33
  electrical methods of measuring, 32
  factors affecting, 28–30
  ideal method of measuring, 30
  mechanical methods of measuring, 30–31
  methods of measuring, 30–32
Pain threshold analysis, **27–34**
  use of, 33–34
Pain scale, simple descriptive, 38–39
Panniculitis, 198
Penicillamine, and anti-rheumatic therapy, 63
Periosteal new bone, 94
Peripheral joints, notes on measurement of individual, 8–11
Personality, and pain, 30
Perthe's disease, 126
Phenylbutazone, effect of, 266
Pivot joints, 5
Plain joints, 4
Proteins—
  and gout, 264
  in juvenile rheumatoid arthritis, 257–258
  in rheumatoid disease, 262–263
  in synovial fluid, 165–166
Pseudogout, 114

Psoriasis, childhood, 125
Psoriatic arthropathy, 99–101, 244–246
Pyrophosphate arthropathy, 114

RACE, and pain, 28
Radioisotope indices, polyarticular, 70
Radioisotopes—
  in the study of normal and inflamed joints, 67–74
  intra-articularly administered, 67–68
  intravenously administered, 69–70
  relationship to clinical assessment methods, 70
  relationship to other objective indices, 71–72
Radiology in rheumatic diseases, **93–127**
Radiometry—
  animal studies with, 53
  limitation of, 53
Rectal biopsy, 204
Rectal histology, 204
Rectal mucosa, 204–205
Reiter's disease, 101
Reiter's syndrome—
  and reactive arthritis, 239–243
  chronic, 240–241
  gonococcal arthritis and, 242
  in women and children, 241
Reiter's tetrad, incomplete, 240
Renal function—
  in gout, 260
  in juvenile rheumatoid arthritis, 258
  rheumatoid arthritis and, 253–254
Renal toxicity of salicylates, 265
Rheumatic diseases, tissue typing in, **231–249**
Rheumatic fever, childhood, 125
Rheumatoid arthritis—
  arthroscopy of, 85–86
  biochemical studies of, 253–257
  measurements of, 46
  radiology in, 93–99
Rheumatoid disease—
  biochemical assessment of, 262–263
  childhood, 124
  uses of the thermographic index in, 57–63
Rheumatic diseases—
  biochemical studies in the assessment of, **253–267**
  biopsies and tissue diagnosis in the, **179–207**
Rheumatoid factors and anti-Ig activities: relation to different populations of lymphocytes, **211–229**
Rheumatoid factors in synovial fluid, 169
Rheumatology, antibodies to polynucleotides in clinical, **223–229**
Rigor-stiffness, 43
RNA, antibodies to double-stranded (viral), 227–228
Rotation (spinal), 16–17

Rubor, calor and, 42

SACRO-ILIAC joints and spine, in rheumatoid arthritis, 96–98
Sagittal mobility (flexion and extension), 14–16
Salicylates, effects of, 265–266
Salivary glands, biopsy of minor, 206
Scanning, central bone and joint, 73–74
Scheurmann's disease, 125
Scleroderma, 106, 197
  measurements of, 47
Sellar joints, 5
Serum analysis in rheumatoid arthritis, 253–257
Serum-anti-Ig, 213–214
Serum cholesterol, effect of salicylates on, 266
Serum iron, 256–257
Serum proteins, 255–256
Serum urate, effects of salicylates on, 265
Sex, and pain, 28–29
Shoulder joint, 19
  in rheumatoid arthritis, 96
  synoviography of, 136–137
Skin, diurnal and daily variability, 57
Skin biopsy, 195
Skin histology, 196–198
Skin temperature related to joint temperature, 52
SLE, role of N-DNA in pathogenesis of, 227
Spheroidal joints, 5
Spinal apophyseal and uncinovertebral joints, and osteoarthritis, 108–109
Spinal motion—
  anatomical aspects, 11–12
  measurement of, 11–19
  normal range of, 21–22
Spine, in acromegaly, 120
Spondylitis, degenerative, 121–123
Sterility, and arthrocentesis, 151
Steroid injection, changes in the thermographic index after intra-articular, 58
Still's disease, 123–124
Surface temperature, correlation of with intra-articular blood flow and pathology, 52
Synovial biopsy, 179–182
  and diagnosis, 182–189
  and research, 189–192
Synovial fluid—
  chemistry of, 165–167
  collection and storage of, 156–157
  crystals in, 170–176
  examination of, **149–176**
  immunological tests of, 167–170
  microbiology of, 164–165
Synovial fluid analysis, 261
  diagnostic usefulness of, 277–281
Synovial fluid results, 289–290
  some implications of, 281

Synovial histology, value of, 182–192
Synovial permeability, measurement by radioisotopes, 68
Synovial tissue changes, 290
Synoviography, 129–146
  materials injected, 129–130
  technique, 130–131
Synovitis—
  arthroscopy of crystal, 86–87
  pigmented villonodular, 117–118
Synovium cartilage, menisei and anterior cruciate ligaments, normal appearances of, 85
Systemic lupus erythematosus, 196–197

T-CELLS, anti-Ig actively mediated by, 218
Temperature, and pain, 31
Temporal artery—
  biopsy, 202–203
  histology, 203–204
Temporomandibular joint, 10
Thermographic index—
  changes in after intra-articular steroid injection, 58
  changes in after oral non-steroidal anti-inflammatory drugs, 58, 61–63
  comparison of the effects of standard non-steroidal agents using the, 63
  uses of in rheumatoid disease, 57–63
Thermography—
  control of ambient conditions, 56–57
  in the assessment of inflammatory arthritis, **51–64**
  standardisation and quantification of, 53–57
Thoracic spine and degenerative spondylitis, 122–123
Thoraco-lumbar spine, measurement of, 12–17
Tissue-bound anti-Ig, 215–217
Tissue typing rheumatic diseases, **231–249**
Treatment—
  measurement of the adverse effects of, 43–44
  measurement of the outcome of, 45
Trochoid joints, 5
Tumour-swelling, 42–43

VASCULAR occlusion, and pain, 31
Vasculitis, 197

WRIST, 9
  synoviography of, 133

Index

Note: Page numbers of article titles are in **bold face** type.

ALLERGIC disorders, 312–314
Anaemia, Fanconi's, 484
Ankylosing spondylitis in children, **387–395**
  clinical symptomatology, 390–391
  differential diagnosis, 391–393
  management and treatment, 393–395
Arthritis—
  bowel diseases associated with, 359–360
  haemophiliac, 376
  infectious and post-infectious, 306–312
  peripheral, 354–356
  septic, 374–375
  tuberculous, 375
Arthritis of inflammatory bowel disease in children, **353–365**
  aetiology, 359
  differential diagnosis of, 360–362

BACTERIAL infection, pyogenic and tuberculous, 306–307

CAFFEY'S disease, 335
Carditis, 308
  infective, 307
Cataract, complicated, 419–421
Chondromalacia patella, 384
Chorea, 310
Chronic iridocyclitic Still's disease, 402–403
Connective tissue disease, 314–324
Corneal band opacity, 416, 418–419

DERMATOMYOSITIS, 445–454
  clinical course, 451–453
  laboratory studies, 448–449
  pathology, 449–451
  treatment, 453–454
Dermatomyositis, scleroderma and polyarteritis nodosa, **445–466**

EPIPHYSIS, slipped upper femoral, 380–381
Erythema marginatum, 309–310
Eye in juvenile chronic polyarteritis, the, **413–428**
  aetiology, 413–414
  clinical findings, 414–422
  management, 424–425
  treatment, 425–428
  variation and duration of disease, 422–424

FANCONI'S anaemia, 484

GLAUCOMA, secondary, 421
Gout, 324–325

HAEMANGIOMA, 377
Haematological disorders, musculo-skeletal aspects of, **469–484**
Haemoglobinopathies, 479–482
Haemophiliac arthritis, 376
Haemostatic disorders, 482–483
Henoch-Schönlein purpura, 312–314
Hip, mechanical derangements of the, 377–381
Histiocytosis X, 330
Hypercholesterolaemia, familial, 325–327

IMMUNE deficiency disorders, 328
Infantile cortical hyperostosis, 335
Inflammatory bowel disease in children, the arthritis of, **353–365**
  aetiology of, 359
  differential diagnosis, 360–362
Infra-patella lesions, 385

JACCOUD'S arthritis, 311–312
Juvenile ankylosing spondylitis, 401–402
Juvenile chronic arthritis (juvenile rheumatoid arthritis), 314–324
  drugs used in, 321–323
  education and career guidance in, 323–324
  psychological and social problems in, 324
  surgery in, 323
Juvenile chronic polyarthritis, prognosis in, **397–411**
  long-term outcome, 404–411
  stage of referral, 397–398
  syndromes, 398–404
  the eye in, **413–428**

Juvenile rheumatoid arthritis, 314–324, 402

KNEE, mechanical derangements of the, 381–385

LESCH-NYHAN syndrome, 325
Leukaemia, 469–478
  acute, 328
  malignant tumours resembling, 478–479
Limb pains with no organic disease, **487–491**
Lupus erythematosus in childhood, systemic, **429–441**
  aetiology, 429–431
  clinical observations, 431–436
  course and treatment, 438–441
  laboratory studies, 436–438

MEDITERRANEAN fever, familial, 327–328
Meningococcal infection, 307
Metabolic disorders, 324–328
Monoarthritis, **369–385**
  diagnosis, 371–373
  general pathology, 369–370
  management of joint, 373
Monoarticular Still's disease, 403
Mucopolysaccharidoses, 327
Musculo-skeletal aspects of haematological disorders, **469–484**
Myocarditis, 308

NEOPLASTIC disease, 328–330
Neuroblastoma, 329–330
Nutritional disorders, 330–334

OSTEOCHONDRITIS dissecans, 381, 383–384

PANMYELOCYTOPATHY, familial constitutional, 484
Patella—
  chondromalacia, 384
  recurrent subluxation of the, 385
Pericarditis, 309
Peripheral arthritis, 354–356
Perthe's disease, 378–380
Polyarteritis nodosa, 464–466
Polyarthritis—
  conditions that may mimic, 328–335
  diagnosis and management of acute, **305–335**
  management of juvenile chronic, 320–321
  prognosis in juvenile chronic, **397–411**
  the eye in juvenile chronic, **413–428**
Polymyositis, 454–455

Psoriatic arthritis in childhood, **339–351**
  aetiology, 340–341
  clinical features, 341–346
  definitions, 339–340
  laboratory findings, 346
  radiotherapy, 346–348
  treatment, 348–349
Psychogenic limb pains, 335
Pyogenic and tuberculous bacterial infection, 306–307

RHEUMATIC fever, 308–311
  clinical features, 308–310
  investigations and diagnosis, 310–311
  management of, 311
Rheumatism, acute, 308–311
Rickets, 330–333

SCLERODERMA, 455–464
  clinical characteristics, 456–459
  laboratory studies, 461–462
  localised, 459–461
  pathogenesis, 463–464
  pathology, 462–463
  treatment, 464
Sclerosis, progressive systemic, 455–459
Scurvy, 333
Septic arthritis, 374–375
Serum sickness, 314
Sickle cell disease, 481
Spondylitis, 357–358
Still's disease, 315, 375–376
  ocular triad of, 421
Synovial tumours, 377
Synovitis—
  transient, 377–378
  villonodular, 377
Systemic Still's disease, 403–404

THALASSAEMIA, 481–482
Trauma, 334–335
Tuberculous arthritis, 375

UVEITIS—
  acute anterior, 414–415
  chronic anterior, 415–416
  posterior, 421–422
Uveitis in children, incidence of, 413

VILLONODULAR synovitis, 377
Viral infections, 307–308
Vitamin D-resistant rickets, 333

Index

Note: Page numbers of article titles are in **bold face** type.

ACUPUNCTURE, in treatment of osteoarthrosis, 623
Alclofenac, 620
Analgesic/anti-inflammatory agents, 618–621
Ankle and foot—
  osteoarthrosis of, 551–552
  radiographic features of, 593–594
Apophyseal osteorthrosis, 566–568
Arthritic, sexual counselling for the, **639–651**
Arthritis of the knee, degenerative, 549–550
Arthrodesis, 659, 684
Arthroplasty, 685–686
  cup, 660–661
  excision, 660
  metaplasia after, 518
  types of replacement, 666–668
Arthroscopy, 609–610
Arthrosis, differentiation from arthritis, 509–510
Articular cartilage, mechanisms acting to protect from repetitive impulsive loading, 512–514

BACK pain, **557–582**
  inflammatory causes of, 580
  metabolic disease and, 581
  neoplasms as cause of, 580–581
  non-specific, 576
  Paget's disease and, 581
  referred pain and, 581
  structural causes of, 562–578
  treatment of low, 578–579
Benorylate, 618
Biofeedback, in treatment of osteoarthrosis, 623–624
Body image and sexual counselling, 643–644

CALIPERS, 630
Cartilage destruction—
  factors leading to progression of, 514–516
  progressive *vs* non-progressive, 510–511
Charnley prosthesis, 666
Chondrocalcinosis and osteoarthrosis, 612
Chondromalacia, 516–517
Chondromalacia patellae, 527
Community, osteoarthrosis in the, **495–505**
Contraception, 645–646
Costo-vertebral joints, radiographic features of, 602
Counselling, definition of, 649–651
Cup arthroplasty, 660–661
'Curative' treatments, for osteoarthrosis, 622–623

DEBRIDEMENT, for osteoarthrotic knee, 680–681
Degenerative disease of the spine, and back pain, **557–582**
Depression, in arthritis, 642–643
Dihydrocodeine, 618
Disc, prolapsed intervertebral, 563–566
Discography, 570
Drug therapy, for osteoarthrosis, 617–623

ELBOW—
  osteoarthrosis of the, 553
  radiographic features of the, 593
Employment and osteoarthrosis, 631–632
Environmental modification, during rehabilitation, 634, 635

FEMORAL head replacement, 661
Fenamates, 620
Footballers, professional, arthrosis and, 531–535
Forage procedures in hip surgery, 656
Fractures, spinal, 575–576
Friction, hip prosthesis and, 663–664

HAND—
  osteoarthrosis of, 553
  radiographic features of the, 590–593
Heberden's nodes, 553
Hinge arthroplasty, 685
Hip—
  femoral head replacement, 661
  osteoarthrosis of, 544–548
    rehabilitation of, 633–634
    surgery for, **653–669**

Hip—*continued*
radiographic features of, 598–599, 601
total replacement of, 661–662
Hip dysplasia, congenital, 544–546
Hip joint, denervation of, 656
Hip replacement, 662–668
Hip replacement, total—
complications of, 666–668
requirements of a centre for, 668
Hip surgery—
forage procedures, 656
landmarks in, 654–655
procedures, 655–662
Hobbies, rehabilitation and, 632

IMMOBILISATION, in treatment of osteoarthrosis, 623
Indomethacin, 619
Injury, sports—
prevention of, 537
treatment of, 537–538
Interphalangeal joints, distal, osteoarthrosis of, 636
Intervertebral disc—
prolapsed, 563–566
investigation of, 568–570
Intra-articular therapy, 621–622

JOINT clearance (cheilectomy), 657
Joint disorders, local, and secondary osteoarthrosis, 611
Joint replacement, problem of total, 518
Joints—
lubrication of, 663
wear and tear on, 523–524
Joints of upper extremities, osteoarthrosis of the, 552–554

KNEE—
fixed flexion of, 635–636
osteoarthrosis of, 548–551
rehabilitation, 634–636
radiographic features of, 595–598
surgery of the osteoarthritic, **671–686**
unstable, 635
Knee joint, degenerative meniscus tear and osteoarthrosis of the, 550–551
Knee pain, causes of, 546–547
Knee replacement, total, 685–686

LIGAMENTOUS injuries, 527
Lubrication of joints, 663

McKEE-FARRAR prosthesis, 666
Meniscal damage, 528
Meniscectomy, 681–682
Metabolic disease and back pain, 581
Metabolic disorders and secondary osteoarthrosis, 612
Metaplasia after arthroplasty, 518
Mobility and lower limb osteoarthrosis, 632–633
Muscle release, 657
Myelography—
and spinal disc, 568–570
epidural, 570

NEOPLASMS, and back pain, 580–581
Neuropathic disorders and secondary osteoarthrosis, 611

OCCUPATIONAL therapy department, functions of in relation to osteoarthrosis, 631–633
Opiates, 618
Osteoarthritic knee, surgery of the, **671–686**
Osteoarthrosis—
aetiology of, **509–520**
aims of surgery for, 653–654
as physiological imbalance, 517
at particular sites, 500–501
clinical manifestations of, **543–555**
community burden of, 502–505
control of, 504–505
diagnostic criteria for, 604–605
drug therapy, 617–623
generalised, 499–500
incidence of, 518–519
individual therapy for, 629–630
investigation of, **587–612**
laboratory and other investigations, 605–610
mechanism of pain in relation to, 543–544
medical treatment of, **615–624**
nomenclature and concepts, 495–497
non-drug treatment, 623–624
predisposing factors, 523–529
prevention, 615–616
primary generalised, 554–555
radiographic diagnosis of, 547–548
radiographic features of primary generalised, 587–604
rehabilitation in, **627–637**
role of mechanical factors, 511–512
secondary, 610–612
treatment of established, 616–624
varieties of, 498–501
Osteoarthrosis and sport, **523–538**
personal series, 530–535
prevention of injury, 537–538
published series, 529–530
Osteoarthrosis in the community, **495–505**
Osteoarthrosis of the hip, surgery of, **653–669**
Osteoarthrotic joints, rehabilitation of certain common, 633–636
Osteochondritis, Scheuermann's, 577–578
Osteochondritis dissecans, 527
Osteotomy, in hip surgery, 657–659, 675–680

PAGET's disease, and back pain, 581
Pain—
causes of knee, 546–547
in relation to osteoarthrosis, mechanism of, 543–544
referred, 581
Paracetamol, 617
Patella, subluxation and dislocation of, 527
Patellectomy, 682–684
Patient information and education, 636–637
Patients—
clinical presentation of osteoarthrotic, 544
modification of, in rehabilitation, 634, 635
selection of for surgery of the knee, 672–675
Pentazocine, 618
Periarthropathie sportive, 535–536
Phenylbutazone, 619
Physiotherapy, in osteoarthrosis, 628–629
Pregnancy in the arthritic, 644–646
Propionic acid derivatives, 620
Prostheses—
friction in, 663–664
problems with hip, 665
Psycho-social factors in sexual counselling, 642–644

RADICULOGRAPHY, 570
Radioactive isotope studies, of osteoarthrosis, 609
Radiography for prolapsed disc, 568
Radiotherapy, 623
Rehabilitation, **627–637**
general principles of, 627–628
individual therapy, 629–630
hip osteoarthrosis and, 633–634
information for patients, 636
knee osteoarthrosis and, 634–635
occupational therapy and, 631–633
physiotherapy, 628–629
splints and applicances, 630
thumb osteoarthrosis and, 636

SACRO-ILIAC joints, radiological features of, 602–603
Salicylates, 618
Sexual counselling for the arthritic, **639–651**
difficulties associated with, 640
mechanical problems, 640–642
Sexual performance, taking a history of, 647–649
Shoes, made-to-measure, 630
Shoulder, osteoarthrosis of, 552–553
Social problems, in arthritis, 644
Spinal problems, frequency of, 557–558
Spinal stenosis, 570–573
Spine—
anatomy and physiology of, 558–562
congenital anomalies of the, 575
degenerative disease of the, **557–582**
radiographic features of, 603
Splints and appliances, 630
Spondylosis—
and apophyseal osteoarthrosis, 566–568
hyperostotic, 576–577
investigation of, 568–570
Spondylolysis and spondylolisthesis, 573–575
Sports injury, incidence of, 524–529
Steroid arthropathy and secondary osteoarthrosis, 611–612
Still's disease, 646–647
Surgery, osteoarthrosis of hip, **653–669**
aims of surgery, 653–654
device of operation, 668–669
historical aspects, 654–655
present situation, 653
problems, 654, 665
procedures (excluding total hip replacement), 655–669
arthrodesis, 659
cup arthroplasty, 660–661
denervation of hip joint, 656
excision arthroplasty, 660
femoral head replacement, 661
forage, 656
joint clearance, 657
muscle release, 657
osteotomy, 657–659
presentation, 655–656
total hip replacement, 661–669
background, 662–663
Charnley prosthesis, 666
complications, 666–668
McKee–Farrar prosthesis, 666
problems, 665
tribology and, 663–665
Surgery, osteoarthrosis of knee, **671–686**
operations, 675–686
arthrodesis, 684
arthroplasty, 685
debridement, 680–681
meniscectomy, 681–682
osteotomy, 675–680
patellectomy, 682–684
selection of patients, 672–675
Synovial effusion, 527

TEMPORO-MANDIBULAR joint, radiographic features of, 601–602
Thermography, 609
Thumb, osteoarthosis of the, 636
Tibial plateau hemiarthroplasty, 685
Tribology, prostheses and, 663–665

WALKING aids, 630
Wear in prostheses, 664–665
Wrist, radiographic features of, 593
